Using Two Subject Areas in Analytics

Doris Munson, Eastern Washington University
July 2016
You can use multiple subject areas

Click on the Add/Remove Subject Areas icon to add a subject area
Select the subject areas you want to use. In this example, we’re adding Fines and Fees.

Click OK when you are done selecting subject areas.
This report now has two subject areas

- Fulfillment
- Fines and Fees
Warning!
Using two subject areas can be tricky!

• There has to be at least one common dimension between the two subject areas

• Descriptive fields must come from the common dimensions
A few of the descriptive fields in common between Fulfillment and Fines and Fees subject areas.
